Question 2.1. Initialisons un nouveau dépôt Git dans un répertoire sandwich, et créons le fichier burger.txt qui contient la liste des ingrédients par ligne.

2.2.En effet, en appliquant la commande Git Status les modifications sont présente dans la copie de travail.

```
AZUIPEADH-JeanNGUEMA@SLAM-1950 MINGW64 ~ (master)
$ cd sandwich

AZUIPEADH-JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)
$ ls
burger.txt

AZUIPEADH-JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)
$ git status
On branch master

No commits yet

Changes to be committed:
    (use "git rm --cached <file>..." to unstage)
    new file: burger.txt

AZUIPEADH-JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)
$ |
```

2.3. Utilisons git status à nouveau pour vérifier qie les modifications ont bien été placées dans l'index. Puis utilisons git diff –cached pour observer les différences entre l'index est la dernière version présente

## dans l'historique de révision.

```
MINGW64:/c/Users/JeanNGUEMA/sandwich
  zureAD+JeanNGUEMA@SLAM-1950 MINGW64 ~ (master)
  cd sandwich
  zureAD+JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)

Your name and email address were configured automatically based on your username and hostname. Please check that they are accurate. You can suppress this message by setting them explicitly. Run the following command and follow the instructions in your editor to edit your configuration file:
       git config --global --edit
After doing this, you may fix the identity used for this commit with:
       git commit --amend --reset-author
  1 file changed, 4 insertions(+) create mode 100644 burger.txt
  AzureAD+JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)
```

2.5. En appliquant à nouveau la commande git status nous pouvons observer que nos modifications ont bien été commités

```
AzureAD+JeanNGUEMA@SLAM-1950 MINGW64 ~/sandwich (master)
$ git status
